HOW TO BUILD PRIMARIS LIEUTENANT

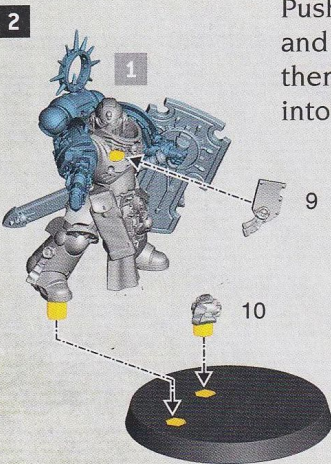

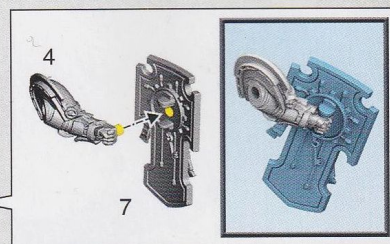

NUMBERING

Component numbers can be found on the sprue, next to each component.

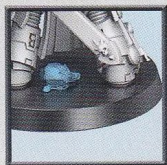

- 1** First, slot the head into position on component 3, and carefully push components 2 and 3 together.

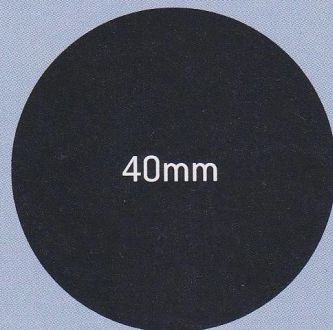

The sword must be pushed into place before the shield arm.

Push components 9 and 10 into place, then push the model into the base.

Your Primaris Lieutenant is now fully assembled.

40mm

40MM BASE

Attach the Primaris Lieutenant to the 40mm base. This is the larger of the two bases.
